Screen Protector for  
iPod Nano 1G  
EasyiPodShop

## **'Clear' iPhone Screen Protectors Available from EasyiPodShop**

### *Dirt cheap screen protectors for any iPod model too*

The guys at EasyiPodShop are offering "clear" Apple iPhone Screen Protectors. That's right, they're clear. Not opaque, but "clear" screen protectors. Nevertheless, they're really cheap and useful, protecting against scratches and fingerprints, not covering the whole device, but just the screen. Differently-shaped/sized models are available for all of Apple's portables, including the iPhone. A screen protector for your iPhone costs just \$0.99. "When you are out on the Road you need to protect your iPhone," the company says on its website. "Here you will find the largest selection of clear Apple iPhone Screen Protectors. Easyipodshop offers the superior quality iPhone Screen Protectors and iPod Screen Protectors for Apple lovers." Question: can a screen protector for your iPhone/iPod not be clear? I mean, if it can, why not just throw your device in a cardboard box and take it out each time you plan on using it. Then, when you're high on cash, upgrade to the "clear" Screen Protector to be able to actually see what's happening on-screen. Eh...Naturally, EasyiPodShop is emphasizing the clearness of its protectors because some, like the Screen Protector for iPod Video 5G and Screen Protector for iPod Nano 1G, cover the whole front of the device, not just the screen (click on the first image to enlarge). However, the "Professional Screen Guard Protector for iPod Nano New Remastered 2<sup>th</sup> [that's 'tooth'] Generation", also featuring a "clear" nature as a plus, obviously can't be but clear in order to become an asset. Click on the second image and you'll understand why. So they're clear, that much we know. What else? The iPod Classic Screen Cover for your iPod Classic 80GB and 160GB is made of "High-Quality Material, 99% Transparency," the manufacturers note. Now we're getting somewhere. The US \$1.99 Screen Cover for your iPod Classic protects against scratching, scraping and abrasion, it is removable without leaving residuary mark, it resists to erosion & fingerprints (this feature alone is actually worth buying the product), it is anti-reflective, and, of course, non-corrosive. It comes bundled with a special cleaning paper too. It measures ~5.2 x 3.9 cm. Best of all, EasyiPodShop says there's no bubble trouble (air bubbles) with its products. Check out EasyiPodShop [right here](#).
