The Qsonix TS17: 1.5 TB of music, 17" touchscreen
Qsonix

[1.5 Terrabytes of Music: Qsonix TS17, Bigger, Better](#)

A music center you'll love

If you're the kind of man who likes serious audio gear around the house and you're also ready to spend some serious money of such equipment, then the new TS17 music management system from Qsonix might be just the tool for you. The Qsonix TS17 is a remake of the older version and will most likely gain even more appreciation and popularity as it boasts bigger storage and better specs.[admark=1]The new Qsonix TS17 music management system comes with a bigger touchscreen, now measuring 17 inches in diagonal, 2" wider than the previous version. This translates into more space and better comfort, while offering more possibilities for the user in terms of easier operation and more data available at a glance. In the same time, the storage capacity has been dramatically increased up to a very serious 1.5 TB; and for those not acquainted with these IT measurements, this equals 4,000 CDs in digital (WMA) format! Even more, you can choose to compress this data and make room for no less than a mind-boggling 25,000 CDs!With such a huge storage space you'll never be on the lookout for other music sources from now on, especially since the TS17 comes with its own optical drive, which lets you burn CDs while in the same time listening to music. Web-based music services are available for complete convenience when hooked up to a network and DirectWay support is also enabled, allowing the users to enrich their music experience.The Qsonic TS17 can be placed on a desk or shelf as well as wall-mounted for complete convenience and easy integration in any home decors or settings. The software upgrade for existing customers is available for free but the cost for a new TS17 is quite hefty: even if the price tag is still unknown, you can easily tailor your budget when thinking that the 15" screen, 1 TB earlier version was just under \$8,000.We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is .
