AMD64 Turion Aims At Business Users

With a range of products

AMD introduced a new level of performance for highly mobile business professionals with AMD Turion 64 mobile technology model ML-40, the latest addition to AMD's popular 64-bit processor family optimized for mobility. AMD Turion 64 mobile technology is designed to bring award-winning AMD64 performance to thinner and lighter notebook PCs with extended system battery life, enhanced security, and compatibility with the latest graphics and wireless solutions. Offering outstanding performance in both 32-bit and 64-bit environments, AMD64 technology is a smart investment today that will not be obsolete tomorrow. "AMD Turion 64 mobile technology is the only available processor offering both 64 bits and enhanced security for thin and light notebook PCs, which are preferred by many business professionals," said Marty Seyer, corporate vice president and general manager, Microprocessor Solutions Sector, AMD. The first notebook PC based on the latest AMD Turion 64 mobile technology model was introduced by HP. The HP Compaq nx6125 notebook PC, which is expected to be available worldwide starting this month, offers mobility, advanced security features, ease of use and real business value to the small to mid-size business professional. Together with other industry leaders, AMD enables a best-in-class ecosystem of open industry-standard technologies, helping PC manufacturers to deliver feature-rich systems that satisfy the variety of ways in which people use their notebooks. AMD Turion 64 mobile technology ML-40 is available immediately worldwide. AMD Turion 64 mobile technology products are now available in models ML-40, ML-37, ML-34, ML-32, ML-30, ML-28, MT-34, MT-32, MT-30 and MT-28. AMD Turion 64 mobile technology uses a series of model numbers designed to provide a simple designation of both relative performance and degree of mobility within the processor family.
