## **ARCHOS Introduces the Gmini 402 Pocket Multimedia Center**

### *For Video, Photos and Music Enjoyment on the Go*

ARCHOS introduced the new Gmini 402 Pocket Multimedia Center. The slim and sleek 20 gigabyte hard-drive-based video, audio and photo device is now Microsoft PlaysForSure-compatible, supporting both protected download and subscription music services, and features a 2.2" color LCD screen and sleek metallic casing. The Gmini 402 is an upgrade from the Gmini 400 released last year and is the perfect summer companion to take up to 80 hours of video, 200,000 photos or 10,000 songs in your pocket wherever you go. The ARCHOS Gmini 402 is designed for media enthusiasts who want to take their video, photos and music with them on a stylish pocket-sized device. With its sleek metallic design, the Gmini 402 measures only 4.17" x 2.37" x 0.69" and is 5.64 ounces, yet offers the largest hard drive capacity and color LCD screen for a product of its size. Using the high-speed USB 2.0 interface, the Gmini 402 will easily auto-synchronize music and video with Windows Media Player 10 each time the device is connected to the PC. The Gmini 402 supports the widest array of music and video formats, including MP3, WMA, protected WMA and WAV audio files, and DivX, MPEG-4, and Windows Media Video files. The ARCHOS Gmini 402 is priced at \$329.95 in the United States. The Gmini 402 comes with earphones, USB cable, USB host adaptor, AC power charger, Quick Start Guide and a protective pouch.
