[ATV Offroad Fury 2 Hints \(PS2\)](#)

Do a backflip

ATV Offroad Fury 2 is the second racing video game in the ATV Offroad Fury series, developed by Rainbow Studios and released on November 9, 2002. The game is preceded by ATV Offroad Fury and followed by ATV Offroad Fury 3. As with the rest of the series, the game revolves around racing on all-terrain vehicles (ATVs). Expanding from its predecessor, ATV Offroad Fury 2 features more ATVs (including Ravage Talons), along with more vehicles, mini-games, championships, and others. **GAMEPLAY HINTS**

Launch into preload Before you hit a ramp, press the Analog-stick Down then Analog-stick Up at the tip of the ramp to launch your ATV into a preload. This is very useful when attempting tricks. **Zoom out** Choose a freestyle competition track and race there. Once it begins, hold R1 L1 Right Analog-stick Down to zoom out to the point to where your ATV and rider appear very small. **Slide perpendicularly to ground** From a standstill on ice, pull a wheelie until you are on the verge of falling. Release the controls completely, and you will be sliding perpendicularly to the ground. Use the following trick to slide perpendicularly to the ground on your front wheels. From a standstill on ice, pull a very high wheelie almost on the edge of falling. Note: It is better to have the "Disabled wrecks" enabled. After the wheelie is pulled fully, Brake and press Forward at the same time then release all controls. **Backflip** Enable the "Disable wrecks" code, go to the track with the railroad, and jump off it. You will be launched in the air. Hold Left-Analog Down while in the air. This works better in first person view and does not award any points. Here's the final stage of the game:
