## [ATV Offroad Fury 2 Hints \(PS2\)](#)

*See the moneky*

ATV Offroad Fury 2 is the second game in the ATV Offroad Fury franchise, developed by Rainbow Studios. The game is sequel to ATV Offroad Fury and, in its turn, has a sequel in the form of ATV Offroad Fury 3. The main draw of the game is the ability to take and drive off-road vehicles on a variety of tracks posing different gameplay challenges. The game is more varied than the first in the series, with more ATVs, more mini-games and more championships on offer.

**GAMEPLAY HINTS**

**Stay longer in the water** Press X Down and do a wheelie before the five-second water limit runs out. This will allow you to stay in the water for as long as you can ride a wheelie.

**Drive in stunt position** Enable the "Disable wrecks" code, then do a stunt. Keep holding the stunt buttons when you land and you can drive while still in the stunt form.

**Easy win** Start with a Red Ravage Talon and edit the engine stats all the way up, except for perhaps two. Take traction down by 1 or 2, and on suspension go up by 2. When you get enough profile points, buy the ATV that resembles a Yamaha Banshee or the Trinity Racing ATV and set it up the same as your Ravage.

**Easy points** Enable the "Disable wrecks" code, then enter freestyle mode. If you flip the ATV, you can keep doing stunts until it flips back over. You can get up to twelve combos before you stop getting points, unless the back tires are moving you on the ground. It is possible to get up to 30 combos and 200,000 points from one flip over.

**Anaconda** At the track that looks like the Amazon, go to one of the tracks that leads into a river. Once there, you will see an alligator and some piranha. Staying on the bank, drive down the narrow but deep river and you will see an anaconda swimming around.

**Monkey** On the St. Croix Sound level, travel to the second island across from a volcano. There should be a very narrow, shallow creek/river somewhere on that island, barely big enough to fit your ATV in. Follow it and you will see a monkey jumping around in a tree. Here's the final stage of the game:
