## [Avatar: The Last Airbender Cheats and Hints \(PC\)](#)

*Double damage, Chi, plus other codes and gameplay hints*

**Avatar:** The Last Airbender - The Burning Earth (known as Avatar: The Legend of Aang - The Burning Earth in Europe) is a video game for Xbox 360, Wii, PlayStation 2, Nintendo DS, Game Boy Advance, and based on the animated television series Avatar: The Last Airbender. The game is the sequel to the story from original game "Avatar: The Last Airbender" which is available on the Xbox 360, Wii, GameCube, PlayStation 2, PlayStation Portable, Windows, Nintendo DS and Game Boy Advance. Taking place during the events of the Second Season, Book 2: Earth, the game will allow players to control Aang, Katara, Sokka, Toph, Zuko, Iroh, and Jet as the battle against the evil Fire Nation continues. Enemies include **Firebenders**, Dai-Li agents, Sandbenders, as well as a variety of other enemies and animals from the show. A departure to the first game is the lack of Cel-Shading. Instead, it has solid shading to give the game a more natural look. Unlike the previous version of the game, The Burning Earth features a Multiplayer mode. There are also animal allies Momo and Appa in special 'dramatic air battles'. And for the first time, players will be able to engage in all four Bending styles. Another feature is Aang's ability to go into the Avatar State and unleash its power on enemies. ([Wikipedia](#)) **CHEATSS** Select the "Code Entry" option at the "Extras" menu, then submit one of the codes below to activate the corresponding cheat function: **Codes** Double damage - 34743 Unlimited stealth - 53467 Unlimited copper - 23637 Unlimited Chi - 24463 Unlimited health - 94677 One hit dishonor - 54641 Character concept gallery - 97831 All treasure maps - 37437 **GAMEPLAY HINTS**  
**Unlimited experience** Whenever you are in battle you can go back later to get more experience. You will be able to get unlimited experience. **Destroying the fire machine** This is the machine you must fight in order to find Katara. Dodge the fire bending. Try running left to right, then right to left. Continue this until you see a flashing light near it. This is your chance to attack. Hit it with Aang. You may use a Chi attack but just a plain attack should work just as well, however it takes time. You will have Saka (Katara's brother) fighting with you to do double damage. After about a quarter way down on HP, the machine will start throwing fire around. Keep a safe distance from this attack. It causes no real threat to your or your partner as long as you stay as far away as possible. **How to beat the Maker's last machine** You can wait for it to stop attacking, or you can attack it, which will barely affect it. Once it is done attacking, you must attack the sides which turn red. Great gameplay footage from this anime-based title: Now, some screenshots from the PS2 version:
