## [Battle Raper 2 - Sex Scene Unlockables and Hints \(PC\)](#)

*Hentai mode, CG images and many more*

Battle Raper 2 is a Japanese [video game](#) that is the second game in the Battle Raper series. The game is a 3D fighter where the players are able to knock the female opponent's clothing off through combat. The story line has no relations to the original Battle Raper. While the title may imply otherwise, there is no actual rape in the game. In Battle Raper 2 the player also has the option of editing the clothing and weapons of the characters. In [combat](#) every character has unlimited guard, a move that cannot be blocked, and a super move. The main character that you play as is Yuuki Kukami. He is armed with a sword and a gauntlet called the Soul Eater. He is followed by a succubus named Eliza who turns into the sword. His element is Dark Flame. He resembles Final Fantasy 8 character Squall Leonhart. Replay mode allow you to have sex with any female characters you finished the storyline with. To change their positions, you have to wait for the characters to move themselves. ([Wikipedia](#))

**UNLOCKABLES**

**H-mode (hentai mode)** replays by completing Story Mode with a selected girl. Note this includes completing the sex scene with the selected girl until the credits are issued (do not quit to title or exit the game). H-replays are accessed in the Extras menu under Replay and are auto-saved to your profile when the credits are displayed.

**CG Images** Unlock the various CG still images in the Extras menu by completing Story Mode with all the girls. Note that the stage you select after fighting the first enemy determines which set of girls you unlock (that time). To unlock Setsuna Yagami's CG (the ninja girl), you need to select the bottom option after playing either set of girls the first time (it is the first decision in Story Mode). The other girls are "unlocked" when you select them in the second decision window.

**GAMEPLAY HINTS**

**Option Translation** Most of the menu is written in English, but some of the options are written in Japanese. The middle Japanese option in the Extra Mode allows you to edit a girl and then go into a scene (after you select a stage). The Japanese choice for Free Mode in the options menu is whether or not a sex scene will occur after a free mode bout (this is defaulted to OFF). You can, of course, turn it ON if you want to see the sex scenes. Great about this game is the fact that the female fighters lose their clothes during fights. So... here's one:
