[Beatmania Unlockables \(PS2\)](#)

Get another mode

Beatmania was developed by Konami Computer Entertainment Japan, Inc. and was published by Konami Digital Entertainment, Inc. in North America in March 2006. The game is based on the Beatmania concept, already popular in Japan at the moment of release, and is the first representative of the rhythm and beat genre that achieved significant success in North America. The game features more than 50 tunes and it's more like Beatmania IIDX than the original game released in Japan. The game comes bundled with a special controller that acts like the DJ scratch pad, complete with seven keys. You must be able to manipulate the scratch pad and the controls in accordance to the instructions that appear on the screen. As you achieve a degree of rhythm, you earn the approval of the audience and get points. Only if you get the audience to react to your moves will you be able to progress through the game. Each of the keys on the controller has one corresponding vertical bar on the screen. The turntable also has special bars, and they are used to indicate the path that rectangular icons follow as they go down towards a horizontal line, which sits near the bottom of the same screen. You should hit the key that corresponds to the bar and also rotate the turntable when the icon matches with a line. This will trigger a preset sound sample and you recompose the song properly. Players are judged for each key press for the accuracy.

UNLOCKABLES

Another mode Play every song in Beatmania IIDX and Beatmania mode to unlock the Another difficulty setting.

Bonus Internet ranking courses Play every single song in Beatmania IIDX and Beatmania mode to unlock the following bonus Internet ranking courses and the corresponding songs.

06 Internet ranking course
