[Blood 2: The Chosen - Cheats and Hints](#)

Being the Chosen is not what it used to be

Monolith has a long history of great games and Blood 2: The Chosen is just one of them. The fact that we can remember a game released seven years ago and still keep it in such high regard is simply enough. Unlike the first installment, Blood, which was set in 1920s, Blood II takes place in the year 2028, so in addition to conventional weapons and magical items, it also incorporates science-fictional technology. As well as its predecessor, the game is significant with excessive graphic violence and a crude style of humor. **Cheat mode:**

Press T for the "Talk" feature, then enter one of the following codes to activate the corresponding cheat function."Brian L. Goble is a programming god!" message - mpgoble "Brian L. Goble is a programming god!" message - mpscorpio "Jim Totaro is da man!" message - mptotaro 100 armor - mpnewcroward 25 to armor - mpward 300 health - mpreallynicenurse Add 25 to health - mpnicenurse All items - mpgoshopping All weapons - mpkfa Assault rifle - mpassaultrifle Beretta; enter again for dual weapon - mpberetta Bug buster - mpbugbuster Changes character model to Caleb - mpcaleb Changes our character model to Ophelia - mpophelia Changes your character model to Gabriella - mpgabby Changes your character model to Ishmael - mpishmael Cobalco laser rifle - mplaserrifle Extra weapons - mpbeansofcoolness Flare gun; enter again for dual weapon - mpflaregun Full ammo - mpammo Full health - mphealthy God mode - mpgod Hide coordinates - mphideme Howitzer - mphowitz Increase speed - mpspeedup Increase strength - mpstronger Increased power; more gore - mpbeefcake Invisibility - mptakeoffshoes Kill all monsters on level - mpkillmall Life Leech - mplifeleech Minigun - mpminigun Napalm cannon - mpnapalmcannon No clipping - mpclip Sawed-off shotgun; enter again for dual weapon - mpshotgun Singularity generator - mpsingularity Sniper rifle - mpsniperrifle Sub-machine gun; enter again for dual weapon - mpsubmachinegun Tesla cannon - mpteslacannon The Orb - mptheorb Third person view, requires v1.01 - mpfollowme Triple damage Power-up - mpherkermur View coordinates - mpwhereami Voodoo doll - mpvoodoo Will power power-up - mpcarbonfiber nknown - mpsuperzug

Level select:Start the game with the +enableretaillevels 1 command line parameter, then select one player mode. Click on the "Custom Level" option to view a list of all available levels.**Seeing past doors:**If you are curious about what is behind a locked or closed door, use "The Eye" to see behind it. Get close enough that when you drop "The Eye", you do not pick it up when dropping, but it disappears. Then look through "The Eye" and you should be able to see what is behind the door. This may require few attempts. Note: You may lose "The Eye" if you or the enemy destroys it. If that happens, you will be blinded for several seconds,**Long range targeting:**Use the following trick to hit targets at long range with accuracy without the sniper rifle: you need the binoculars and a gun with good shot accuracy, such as the pistol. Use the binoculars and focus the center of the viewer [+] on the target. Then, disengage the binoculars and the crosshair should be centered on the target. Fire away and you should hit anything.
