## BloodRayne Cheats and Passwords (GameCube)

### *Unlock God Mode and restore health*

**BloodRayne**, is a horror-themed third-person action video game. It has a sequel, BloodRayne 2, a movie and a series of self-contained comic books. It was developed by Terminal Reality. The main objective is to kill the Gegengeist Gruppe (G.G.G., German for "Anti Ghost Group") officers in 40 levels and three worlds. Rayne's main attack is her blades, which can either just harm, or dismember the enemy. Aside from her combo attacks, she has her harpoon (received very early in the game), which she can reel in enemies from a distance to feed on. Feeding is how **Rayne** regains health, which at the same time kills the enemy. The player can choose whether or not to let the enemy go, which is useful should the player accidentally start to feed on an enemy while surrounded, or to avoid being hit by an explosive device, such as a grenade or rocket.

**Passwords**  
**Password Cheats** Enter the following passwords for the desired effect:  
ONTHELEVEL - Level Select  
JUGGYDANCESQUAD and press Start instead of A after the word SQUAD is in place - Make the females have larger 'assets'
