Celine Dion Wants A Second Child

She will begin in vitro fertilization treatments at a New York clinic

Celine has recently declared for a French magazine that she intends to have a second child as soon as she finishes her contract with Caesar Palace, in 2007. She said she will begin in vitro fertilization treatments at a New York clinic. The 37-year-old singer confessed: "I'm approaching 40 years old, and I have to tend to that. This frozen embryo that is in New York is my child waiting to be brought to life." She and her husband already have a son, Rene-Charles Angeli, now 4 years old. Celine first met her husband, who is also her manager, when she was 12-years-old and he - 38. This rather uncommon love story developed soon and is considered by the singer as the foundation of her strength. Celine was honored by two governments in two days back in 1998: on April 30, her home province awarded her L'Ordre national du Québec, and, on May 1, the singer became an Officer of the Order of Canada.
