"Chocolate Fifteen Puzzle"
Dynamic Pixels

["Chocolate Fifteen Puzzle" Sweetens Your Phone](#)

Make your own chocolate bar

This game coming from Dynamic Pixels is probably one of the oldest concepts ever developed. It's easy to play and requires very low performances from the device that it runs on. "Chocolate Fifteen Puzzle" makes one of the best games to run on virtually any handset and offers hours of fun. Dynamic Pixels intended to go beyond this and bring to the [game](#) more than just fun. The player will have to solve a number puzzle displayed on a 4x4 grid, with one piece missing. S/he then has to move one number at a time in order to arrange them all in crescent order. The challenge of the game rests in the fact that the player must complete it with as few moves as possible and within a time limit. But where does the chocolate fit in? Each number is displayed on a square from a chocolate bar, looking smooth and delicious. Those trying to keep away from this type of treats are probably better off keeping away from "Chocolate Fifteen Puzzle". The mere sight of the creamy sweets makes your mouth watery and also difficult to keep your mind off sinking your teeth into such [delights](#). The game also brings another award for the best players. The first 10 wins will receive the first distinctive star from the 5 possible. The player must collect all the 5 stars and become a Master of "Chocolate Fifteen Puzzle". That's quite a challenge and also a tasty treat to enjoy on the way to earning the title. One more challenging aspect about the [game](#) is that it places the best players in the top of on-line records, a title that he must struggle to keep. "Chocolate Fifteen Puzzle" is available for download from now on and is compatible with most handsets out there.
