## [CoCo Shakes Her Boobs on TV](#)

*And her a\*s is not far behind...*

CoCo is just one of the most talented creatures alive. I had no idea that directors out there never actually had enough sense to call CoCo in for an audition, but if they had been blessed with this insight they would definitely have realized they have a true, authentic and genuine (actually, all those words mean pretty much the same thing, but I just felt the need to emphasize this again and again) talent on their hands. And probably not only on their hands...given that CoCo was never one to step back from performing rather more...let's call them undignified duties. I mean, otherwise I can't imagine why she'd stay married to Ice-T. Remember what they say about birds of the same feather. But really, just have a look at the clip below. CoCo and Ice-T put in an earth-shattering appearance in Law & Order: SVU last night and you can see for yourselves, she really rocked it. My first reaction was to grab the phone and try to find a direct line to the producers of the show. I was going to ask them to please, make CoCo one of the show's regular guest stars, because she sure has what it takes to rock our worlds. And she doesn't necessarily need to play the same character, she can show off her many acting skills by approaching complex, various roles. Let's see - she could play...a hooker that gets murdered by a deluded, a\*s-chopping serial killer, an exotic dancer in a club called "Ass You Like It"...and many more such deep, insightful parts. See? There are plenty of opportunities for our CoCo. In this particular context, CoCo plays the slutty fiancée of a potential rapist. Told you she had potential. Let me warn you, though: while you're watching CoCo have a tense confrontation with her real-life pimp...I mean, hubby Ice-T, don't get distracted by aspects that are not at all relevant to CoCo's acting skills. Don't start staring at her boobs, or checking out her a\*s, because that would be completely unfair. She's got real acting potential, and someone needs to tap it before it all goes to waste. So, any offers?
