## [Commandos 2: Men of Courage - Cheats and Hints](#)

### *The isometric view rules again*

Commandos 2: Men of Courage is regarded by many (including myself) the best squad strategy in the entire series, even better than the last attempt. It mattered not that it was only 2D and that it was built entirely on sprites, the feeling of accomplishment and the variations has turned this game in a must have for any gamer. This is one of the few games that can appeal to most players, even if some of them might prefer specific genres like first person shooter or simple strategies. Enter GONZOANDJON as a name to enable cheat mode. Then, press one of the following keys during game play to activate the corresponding cheat function. Cheat mode can also be activated during a mission typing GONZOANDJON after selecting a commando (you cannot see what you type and there will be no confirmation). **Place selected commandos under the pointer [Shift] + X** Invincibility [Ctrl] + I Invisibility [Ctrl] + V Display frame rate [Ctrl] + [Minus] Mission skip [Ctrl] + [Shift] + N Destroy all opponents [Ctrl] + [Shift] + X **Level passwords:** Enable cheat mode, then enter one of the following passwords at the Keyed Missions prompt. *Normal Difficulty* XHGDR WKUC4 YSM51 B7D8F 3GHSL AZLM1 JAHSJ UN63A VAZ2P 9TT5W *Hard Difficulty* PLKUMJE5SHDFY3BK9D3HNMWQ916G3LWL3CZLPQ6TSRCM8PAEN8 *Very hard Difficulty* PVTSL SKDJF 3DYNG 9BG3S KJWJK E2J7H ZX78Y TRIB4 TRD78 1LPQD **Bonus missions:** Collect all the brown bonus books during a mission to complete the photograph at the end and unlock a bonus mission. Note: The "Saving Private Smith" mission does not have an associated bonus mission. **Stealth:** Always be aware of your enemies'™ vision range. Do not assume that they cannot see you. There is a good chance that the soldier will move around and will spot you. Use the "Eye" tool and place it on an enemy soldier to reveal his vision range. Remember, if your commando is standing up and is in the "light" area of the vision range, he will be seen but it will take about five to ten seconds for your enemy to react. During this time, go into crawl mode. If you are in crawl mode, and are in the "light" area of the soldier's vision range, you will not be seen. However, if you are not using the spy and are wearing an enemy uniform, you will not be seen even when standing. However, the darker area of the vision range is the hot zone. You will be seen, and the enemy will react automatically no matter what, except if you are using the spy. **Easy kills:** Always try a stealthy approach rather than using guns. If you are using the Green Beret, you can sneak up on the enemy and cut him. Remember to pick up his items. This will not alert other soldiers unless the "sound bubble" appears, which is rare. A good tip for handling many soldiers with only a gun is to use the guard vision. Guard vision will place your shooting range in front of you. If an enemy soldier goes onto that vision range, the enemy will be killed as fast as possible. This is a useful method and it does not matter how skilled you are at shooting in the game. The CPU will always do better.
