The new Creative headphones: the EP-830 Creative

[Creative's All New EP-830 Earphones](#)

Cool new gear from Creative

Creative have just unveiled in Singapore their latest headphones model, codenamed the EP-830. This new piece of high-class audio technology comes as a nifty upgrade for the acclaimed EP-630 version and it builds on the same heritage, delivering pristine and lifelike acoustics for music lovers on the go.[admark=1]The new headphones come with carefully-engineered design, and have been built for a comfortable audio experience: they are quite lightweight and pack in only 9 grams, while the rubber sleeves will make sure your wearing comfort is as high as possible. Even more, the Creative EP-830's ear pieces act as a neat noise isolation element, drastically diminishing the ambient noise perception and letting you experience better audio. This doubles as a health issue as the isolation from the ambient noise will let you listen to your favorite tunes in better conditions without having to crank up the volume to hearing-damaging levels.[img=2]The Creative EP-830 come with 9mm Neodymium magnets, delivering a stronger bass and faster response with your preferred tracks, adding in natural sparkle and higher definition; you can use these headphones with any portable device sporting a 3.5mm stereo jack, CD/DVD players and iPods included. There are three ear bud sets for a snug fit in any ear, helping you get the best from these headphones; at the same time, the plug is gold-plated for better signal transfer and the Creative EP-830 come with a neat carrying pouch. On the technical specs side, the new Creative headphones boast a 6-23,000 Hz frequency range with 16 Ohms impedance and 106 dB sensitivity. Coming with a 1.2m oxygen-free copper cable, the Creative EP-830 retail for around \$79 and are expected soon in all major stores. We are just a few, but there are many of you, Softpedia users, out there. That's why we thought it would be a good idea to create an email address for you to help us a little in finding gadgets we missed. Interesting links are bound to be posted with recognition going mainly to those who submit. The address is .
