Cricket 2002 is a video game developed by HB Studios and published by Electronic Arts. The game was developed for the PlayStation 2 console from Sony and for the PC. It was launched in 2001. The game is classed as a sports simulation, in this case based on cricket, and has the licenses required to show real world players in the game world.

Cricket 2002 offers all that you would expect from such a game. There's quite a bit of management mixed in with playing cricket matches, and keeping your players in top physical and psychological state is a must if you want to perform. Changing tactics throughout the season is required to deal with the various challenges posed by the other teams and there are times when transferring a new player is the most important move you have to make.

The game offers both an international mode, where you take charge of a national team, and a domestic mode, where you play in one of the simulated championships. The Ashes is available as a separate event where the player can choose to lead Australia and England through the period which is associated with this historic set of cricket games.
