DXG 503 Digital Camera with Kyocera Lens

With 32 megabytes of built-in memory

DXG USA has announced the availability of the DXG-503, a digital camera with a 5.1 megapixel and 3x optical zoom. The DXG-503 features a 2-inch LCD display, 32 megabytes of built-in memory, SD/MMC card slot and Direct Print capability. Other customer-friendly features include a real image optical viewfinder, red-eye reduction, self timer and the ability to record video clips with sound. The camera can be powered by two standard AA alkaline batteries and offers TV-Out capability for viewing pictures on a television. The DXG-503 provides five white balance settings, four still image settings (VGA, 3MP, 5MP, and 10MP using firmware interpolation) and utilizes a USB 2.0 interface. The camera ships with USB/AV cables, camera case, wrist strap, editing software and batteries. The DXG-503 is now shipping and has an estimated street price of \$149-169. This week, Softpedia would like to know your opinion on gaming consoles. What is your favorite console you either own or you are planning to buy? Are you an Xbox fan or a Playstation fan? Has Xbox360 convinced you it's time to buy one? Or you'll wait for the PS3? [Express your opinion here.](#)
