[Desperados: Wanted Dead or Alive Cheats](#)

El Diablo, you're mine!

Desperados: Wanted Dead or Alive proved to be a captivating stealth-based strategy. The Wild West was always a most attractive subject. Cowboys, duels, pistols, dynamite, gold rush, beautiful ladies and tequila - the game had it all. It also kept the players happy by introducing 6 unique characters with very special abilities that matched marvelously their personalities. The hot shot (John) Cooper was a real charmer - a genuine James Bond of the Wild West. Sam (Williams) is the runaway cotton plantation slave that proves to be much more useful at other tasks... such as blowing things up and heavy artillery. Doc (McCoy) is the physician of the party and the elite sniper behind the bush. Kate (O'Hara) is of course the beauty of the group, but her charms are... lethal. She's the best to use in case you want to set up a trap for any unfortunate man that lays eyes on her. (Pablo) Sanchez would probably have to be the beast in this party. His strength is no match for anyone. He loves his custom made bottle of tequila, taking naps and swirling his big bat at enemies. Mia (Yung) is the tricky Chinese girl that joins the gang in the middle of the action. That blowpipe of hers does a wonderful job of knocking nearby enemies down and the monkey... oh, the monkey is priceless if you want to get someone's attention. Now, this is a great strategy game. You have it all - use tricks, use the terrain, shoot your enemies, charm them, invade their territory and uncover one of the many stories the Wild West has to offer. Yet sometimes it seems like there are just too many people on to you. A little cheating should do the job for you to continue your western adventure, so take a look at the following. In order to bring up the cheat menu you'll need to press and hold the LEFT SHIFT and hit F11. All you need to do now is enter the following codes: fidel castro - show dialogues epitaph - turn victory condition display on/off clint - win the current level (yeap, Clint Eastwood was a legend in the West so he'd do the job)jackal - more ammo show me all - show all objects hollow man - turn invisibility on/off (come on, that's another movie)timeless - freeze time zeus - press than Alt to kill enemies with a flashlight medic - turn hint display on/off (isn't this sweet?)whats my destiny - turn short briefings on/offsupersonic - turn sound zone display on/offpowerman - new weapon schneider - exit the game (why oh, why?)
