[Dita Von Teese Porn Is Real and Is Out](#)

The burlesque queen's lesbian porn past is coming back to haunt her

The past few weeks will definitely go down in history as the time of the years when the largest number of porn scandals erupted - with or without the occasional hooker thrown in for good measure. It was also a time when lots of Hollywood's good girls (be they A, B or D list) exposed their porn pasts and either emerged as shameless narcissists, creepy old men with Nazi porn fetishes or sexy burlesque dancers with a hidden history of lesbian porn. For once, it would seem that the old "professional lesbian porn movie" rumors were true, and Dita Von Teese has indeed been a very naughty girl in her past exploits. Several clips are now doing the rounds on the Internet, and despite the fact that von Teese's past of lesbian fetish-related movies has never been kept a secret, the videos are bound to cause some sensation. Dita's work as an occasional actress is mentioned - in fact, it's credited - on several sites, including Wikipedia. She indeed stripped out of her elaborate corsets and exposed her boobs and her vagina on tape, taking part in some pretty explicit lesbian action involving bondage and the use of sex toys. Most of the porn movies in which she starred are credited to reputed erotic artist, adult film producer and director Andrew Blake: in *Romancing Sara* and *Matter of Trust* she is billed as Heather Sweet (her real name), while in *Pin Ups 2* and *Decadence* she's credited with her stage name of Dita von Teese. One of the clips that's currently being put up all over the Internet shows an elaborately dressed and made-up Dita engage in sexual contact with another fetish model. While Dita's porn past was never the object of any attempt to cover it up, it was not exactly put on parade so far. But anyone interested in doing a little digging and spending some time at the local adult video rental shop could have come up with this "exclusive" information in under a day. Also, Dita's lesbian porn movies are not sadistic Nazi fantasies and don't involve anything illegal - except perhaps the use of too much leather, but that's all a matter of taste. As for the outrage of British giant Wonderbra, it's highly unlikely that von Teese made a secret of her past porn endeavors, so her current bosses most likely knew who they were dealing with.
