[Doom 3 Cheats, Codes and Ending \(Xbox\)](#)

Escape Mars alive

Many years of waiting have made gamers grow old, but still fond of the original Doom games. So fond that the cheats and weapons for those games are still looked up online. **Doom 3** is a remake of the first title with an action that takes place on the demon-infested Mars. This being a horror shooter, you might have some troubling nights after playing such a production. Whispers everywhere, demons coming up from behind you ...and sci-fi guns. It's still the modern mindless shooting game, but with some kickass atmosphere within it. Experience the highest levels of fear and sweat a lot while trying to get past beasts that would make the Resident Evil universe jealous. There are tons of cheats for the PC version and the Xbox one is no saint, so there are a couple of tricks you can do to ease your task:

Easter Eggs *Doom reference* On the last level before you go through the portal to fight the boss. There is a stone tablet somewhere in the last room. If you look at it, you can see the picture of the original Doom cover. **Special PDA from the ID**

developers Right at the end of the game, just before you fight the final boss, as you are walking through the underground hall with all the fire and brimstone there will be a small space in one of the corners you encounter that you can duck under and there will be a brick with the ID symbol printed on it. Press action on the brick and it will open the wall allowing you to get the PDA of the ID developers thanking you for playing the game.

Super Turkey Puncher 3 Go to the first level in Co-Op mode and proceed through the level until 'Command Access Junction'. There you can find two Super Turkey Puncher arcade machines made by 'Nabcon'. On the screen is the face of the original Doom Guy that also makes the same faces when you punch the turkeys. First player to 3000 points wins.

Secrets Hidden movie. Once you kill the first scientist who gets turned into a zombie, look at the main control panel. One of the screens right near you should be blinking red. Click on it to watch a little movie. Here's the ending movie! Beware, as there are spoilers inside:

Machine Gun in Underground passage. After you get the shotgun and reach the security area, go inside and unlock the door. After the door is unlocked, on the same level, look at the bottom of the screen and click on one of the 2 choices. One should bring up the lockers, showing one is locked and the other open. Click on the one that says locked. Now head out into the elevator room and kill the imp that jumps down. Look at the lockers now, the other one is now open, allowing you to have the machine gun and more shotgun ammo. (Note: After you grab all the goodies in the locker, an imp will come out of the door you just came out of to get the goodies.)

Two exclusive levels for Xbox doom3 and Doom3 ROE Doom3 Collector's edition and Doom3 Resurrection of Evil for Xbox both have Ultimate Doom and Doom2 included with it. There are two exclusive levels created just for these 2 games...
