Unlockables **How to unlock the Bonus section** Beat arcade mode once with anybody and then go to the options menu and select bonus, and you can listen to in-game music and play "dragon click"

Secrets **Be in Super Saiyan form when starting a battle!** To start in Super Saiyan form when you immediately start a battle, hold R when choosing your character and press X, and you'll hear a "cling" sound, different from normally choosing your character with no R held down. Remember, for this to work, you have to hold down R and press X on the Super Saiyan form when choosing, not the normal one. Here's the intro FMV and a great fight take from the game:
