[Emperor: Rise of the Middle Kingdoms - Cheats](#)

Build. Conquer. Rule

Emperor: Rise of the Middle Kingdoms is the last in the city building saga from Best Way. It is the final corner stone in the two dimensional era and represents the complete collection of features the developer has gathered across the years. You are transported back in time to when emperors reigned and China was the greatest and most resplendent power on earth. Epic in scope, Emperor spans seven dynasties and more than 3,000 years of Chinese history - from China's pre-imperial Xia dynasty circa 2100 BCE to the Mongol invasion of the Middle Kingdom under Genghis Khan in 1211 CE. As Emperor, you will build housing to attract immigrants to your new city. Then the city's workers and farmers, administrators and soldiers will be yours to command, and you will have the work force you need to build a provincial city into a great metropolis. **CheatsPress [Ctrl][Alt][C] to bring up the cheat console and type in the following codes:** HempForElite - Every elite house in the city receives 100 units of hemp. CeramicsForElite - Every elite house in the city receives 100 units of ceramics. SilkForElite - Every elite house in the city receives 100 units of silk. TeaForElite - Every elite house in the city receives 100 units of tea. WaresForElite - Every elite house in the city receives 100 units of bronzeware/lacquerware.
