[Enchanted Arms Cheats and Hints \(Xbox 360\)](#)

A superb saga comes to life...

Enchanted Arms is a science fiction-based [role-playing game](#) for the Xbox 360 and PlayStation 3. Atsuma, Makoto, and Toya are students at the Enchanter's University in Yokohama City. At the university, they study to become enchanter's, while learning about topics such as the man-made golems that populate the world. Although powerful self-aware golems fought each other and laid waste to the land 1000 years ago during the Golem Wars, golems in the modern era serve mankind. The fights in the game are turn-based and use a grid field similar to what might be found in [games](#) like Shining Force, but on a smaller scale. Allies generally attack first and enemies afterwards, except in the case where the party's speed is significantly lower than the enemy's, in which case the enemy attacks first.

Unlimited Chips & SPAt London city, go to the casino (slum area). Use a save and load method, and play roulette by betting 1000 chips for the first 9-12 numbers which you can earn around 24000-26000 chips if you win. The chances are roughly 1/3 to 1/4. Quit casino and save after you win. Naturally, if you lose, reload your last save. Repeat that and you can earn unlimited casino chips. After you obtained all the goodies in the casino presents, you can sell that item in casino which recovers 50% of your HP and EP at the shop next door. You can only carry 9 on you at a time. So you will have to buy them from casino using chips and sell them at the shop. You can get 5400 TB for 9 of them. Repeat the step above and you can have unlimited money and unlimited SP because SP can be purchased at the shop. **Omega Tactics**Omega is the final boss in the holy beast shrine. At first, it seems impossible to kill Omega with him having 99999 hp and ep but he is rather easy to defeat with a golem that has a special attack that takes a % of damage. I used Sebastian sniper shot. The first few shots with him did about 35000+ damage. Other golems you can use are Raiko or Samurai. Lastly, keep your members out of his God Scream ability if possible. **God Orbs**There are four weapons you can get from the god orbs (one for each of your characters Yuki, Raigar, Karin, Atsuma). The first you have to get is Atsuma's. Get this when you visit the sage. A part of the story of the game after that there are three more you need to find scattered throughout the game. One sage is right outside the sages' area you just go down the stair case and look around the entire tower -- there will be a golem there. When you kill him, you will get its core and a god orb. Another one is in the desert out side the Junk City in one of the ruins but the doors to it are locked. On the middle right side of the area between the 2 ruined buildings is a sink hole. Go to it and you will fall. There is another golem there who will give you a god orb after you defeat it. Then there is the area where the Yokohama Bridge was blown up. Go down to the river like you did when you swam across the first time, only this time don't go across. Go down to the part of the river where you see pieces of a statue blown off. There will be a sandy part on the shore where you can get out. Walk around that area until you find the last golem in a kinda corner and you can get the last god orb from it God orbs make the Iris weapons, which are the second strongest in the game (the strongest are the crystal weapons which can be found in the holy beast area outside of junk city; you can also find omega golem, one of the strongest golems you can obtain). Check out these unlockable characters:
