[Fergie Has One Message for Wax Technicians](#)

Get a job, she doesn't need you!

Well, Sarah 'Fergie' Ferguson just launched her 'Duchess' and, judging from the way her single 'London Bridge' is doing, one can easily say that her first solo album will also hit the charts big time. Apart from her music, we could think of a couple of things to tell the singer: use a bathroom, hire a stylist and get a wax, to make a long story short. While at the big premiere, all dressed up and looking good (no pee stains, either), Fergie displayed an amazing overgrowth of armpit hair. It certainly didn't go that well with her black gown, with a deep cut on one leg and low cleavage. It didn't go that well with bloggers either, with whom she is engaged in a bitter dispute for the nasty comments they tend to make of her, with all of them saying that they are completely grossed out by it. One of them even stated, probably after carefully studying the picture, that it's not even a one or two day stubble, but crass neglect on the singer's side. And with that we feel obliged to agree; we know that Fergie simply loves to shock the world with her wacky outfits but from going to uncommon choices of outfits to appearing in public with a sleeveless dress and with hairy armpits is an entirely different story. And, personally, we don't want to see that again. If your stomach is good, we have also included a close up of Fergie's armpit. Sure, she uses body make-up and glitter, but she can't take a razor and shave that gross thing that can be seen without her even raising her arms...
