[Final Fantasy Girls Meet Dead or Alive Girls in a Neat Animation](#)

Yuna and Rikku versus DOA hotties

Wow, I've lived to see every gamer's fantasy turn into reality ... The gorgeous [Dead or Alive girls](#) go one on one with those superb [Final Fantasy](#) feminine characters in animator Monty Oum's latest work. Yuna and Rikku are not here just to make a beautiful scene, but rather to kick some Kasumi fresh meat. It's rather an unfair fight, staff versus bullets or karate moves versus daggers, but still, the animation's decent enough to rival Square-Enix's works. Of course, it's no Advent Children we're watching here, but the choreography is good enough to even make Sephiroth jealous. Cross-game virtual battles have always been part of our imagination, but there are several titles out there that pit famous gaming characters against each other, even their name is Solid Snake or Sonic the Hedgehog. Monty Oum's pick was a good one, since I can't really remember another pair of hot feminine characters from the Final Fantasy series, so Rikku and Yuna are great. However, Tiffa would have been a good choice too and maybe Aeris, but she's the soft type and there's no point in ruining her reputation. As a matter of fact there aren't as many sexy characters in the FF series as I would have imagined, as the eighth title in the series features that common Rinoa, while the ninth game features kiddies that don't have what it takes to equal Yuna and the likes... On the other side of the barricade, the [Dead or Alive](#) girls are already the standard of virtual hotness, being as sexy as it gets. Tiny or voluptuous, skinny or well-built, Japanese or European hotties, cowboy girls or strippers, there's a female prototype for every male gamer out there. Can the fragile Final Fantasy ladies take them on? Unless Yuna starts summoning Bahamat or something, Square-Enix's girls have no chance against the DOA sexy beasts.
