[Frogger Codes, Unlockables and Speed Run \(Xbox 360\)](#)

Konami's oldie comes back to life on the 360

Frogger is an **arcade** game introduced in 1981. It was licensed for worldwide distribution by Sega/Gremlin and developed by Konami. The game is regarded as a classic and was noted for its novel gameplay and theme. The object of the game is to guide frogs to their homes one by one. To do this, each frog must avoid cars while crossing a busy road and navigate a river full of hazards. The skillful player may obtain bonuses along the way. The game starts with three frogs. A player guides a frog which starts at the bottom of the screen. The lower half of the screen contains a road with motor vehicles, which in various versions include cars, trucks, buses, taxis, and/or motorcycles speeding along. The upper half of the screen consists of a river with logs, alligators, and turtles, while the very top of the screen contains five "frog homes"-the goal for each frog. Each level is timed, so the player must act quickly to finish each level before the time expires.

Codes
Konami Code: Make Frogger biggerAt the screen where you are selecting to choose One or Two players,

using the D-pad, enter in the Konami code (Up, Up, Down, Down, Left, Right, Left, Right, B, A), this will make Frogger bigger

Unlockables
AchievementsComplete each of the following achievements below to get the allotted gamerscore.

Chicken 1 (10) - In Level 1 stay on the road until the timer is red, then reach home.
Chicken 2 (15) - In Level 2 stay on the road until the timer is red, then reach home. Co-op Brilliance (20) - Reach a score of 30,000 or more while playing an Xbox Live co-op game. Full Stomach (10) - Eat 3 bugs in one game. Helping Hand (20) - Save 5 lady frogs in one game. Home Sweet Home (20) - Deliver 15 frogs to the frog home without dying. Speed Racing (20) - Get all 5 frogs home in Level 1 in less than 45 seconds. Well Ordered (15) - Fill 5 frog slots from right to left on any level. Here's the speed run of this classic title, that's gone next-gen thanks to the port on the Xbox 360 console:
