[GizMac Announces New Flavors for the Titan Clear iPhone Case](#)

Mid-May will see the release of two fresh Titan Clear cases for owners of an iPhone

GizMac, the company responsible for some of the best iPod / iPhone case designs out there, has updated its line of Titan Clear cases adding a touch of color to it. iPhone owners will soon be able to get a green, or a blue-flavored case for their device (in addition to the already available smoke, pink and the original clear model) for US \$34.99. Titan Clear for iPhone can be used either alone or with the included rotating belt clip holster, GizMac explains. The cases are made of tough polycarbonate plastic that protects your device, but also allows its beautiful appearance to show through, all this while the case itself enhances the way you carry your device around, not obstructing the areas for the controls, camera, headphone jack and screen. Built-in retractable horizontal and vertical kickstands are adjustable at many angles for optimum iPhone viewing, GizMac notes, while a rotating belt clip holster only comes to allow you more ways to use your device on the go. Titan Clear Cases come in smoke, pink and clear for now but, as soon as the blue and green models are released, you will be able to purchase one as such or with the clear frosted rotating holster. The Titan Clear Case fits all available iPhone models (4GB, 8GB, and 16 GB iPhone). GizMac is dedicated to providing solutions and support for the iPod & iPhone communities around the world. The company's Titan accessories lineup offers cases including: Titan Clear for iPhone, Titan Clear for iPod, Titan Gear and Titan Metal. The company has been close to Apple mostly since releasing the first accessories for the iPod, and has even been showing products at MacWorld, in San Francisco, for three consecutive years now. The newly announced Titan Clear Case for iPhone will be made available later on this month. We'll keep a close eye on GizMac's activity to be able to confirm their release.
