[God of War 2 Cheats and Secrets \(PS2\)](#)

Kratos returns, as the cruel mortal we know

[God of War 2](#) really carries its weight, making excellent use of the PS2 hardware's capabilities. The best part of the game is the animation, which is practically seamless, no matter what the player does. The developers evidently went out of their way to make sure every possible scenario was animated in a realistic fashion. As a result, the player won't find any weird movements between getting hit and going into another combo move. Everything transitions beautifully, and save for a few glitches, players might run into here and there (most of which are minor) as this game is just about as polished up as polished up gets. We provide you with cheats and unlockables for this superb game and we'll just have to wait for [God of War 3](#) to see what happens to Kratos: **Unlockables**
Arena Of The Fates Receive Titan rank on The Challenge Of The Titans to unlock in the Treasures section. It's kind of a practice mode where you choose the health/magic/abilities/enemies, ect. **Challenge Of The Titans Mode** Complete the game on any difficulty mode to unlock in the treasures section. Exactly like the Challenge Of The Gods mode from the first God Of War, except there are 7 challenges. **Unlock Titan difficulty mode** Simply complete the game on any other difficulty mode. **Unlockable Costumes** Must complete the game on certain difficulty levels, Collect certain Items and receive certain ranks. Athena - Complete the game on Titan mode. Dark Odyssey - Complete the game on God mode. General Kratos - Collect 20 Cyclops eyes. Must kill them with a context-sensitive move. Meaning the O button. God Armor (The best costume, Doubles all stats) - Receive God ranking in Challenge mode. God of War costume - Complete the game on any difficulty level. Hercules - Complete the game on Titan mode. Hydra Armor - Complete the game on any difficulty level. **Secrets**
Bonus Play To Start a new game with all Weapons/Magic at the levels you completed the game at, simply save your game and start a new game. Choose the Bonus Play option and you can start a new game with all your weapons/Magic at the levels you beat the game with. You can only choose the Bonus Play option on the difficulty you've beaten the game on. They will be marked by a sword on the New Game screen. Kratos gone cold? This is known as "The Piercing Cold" level:
