## [Gradius Collection Cheats and Unlockables \(PSP\)](#)

*Later versions of the game also include the option of choosing different weapon systems*

**Gradius Collection** is a compilation of five beloved Gradius titles in one exciting game. Spanning more than 20 years of exciting releases, the titles include Gradius, Gradius II, Gradius III, Gradius IV and the never-before-released in the United States, Gradius Gaiden. Each game delivers frenetic shoot 'em up action as the player traverses a series of scrolling stages in a running battle against **hordes** of enemy formations. On shooting specific fleets of ships, a golden icon is left which illuminates a weapon list at the bottom of the screen. Collecting successive icons highlights more powerful weapons, with players enhancing the speed of their craft, adding secondary weapon units, lasers, missiles or a force field. Later versions of the game also include the option of choosing different weapon systems that include directional lasers and missile systems.

**Cheats** Pause in any game under their easier difficulty setting, then press Up(2), Down(2), Left, Right, Left, Right, L, R. All weapons and power-ups will be unlocked. In the Japanese version of the game, press Up(2), Down(2), Left, Right, Left, Right, X, Circle.
