## [Guilty Gear Judgment Bonus and EX Characters \(PSP\)](#)

*How about those Bonus Characters and EX Characters - hard to come by, right?*

**Guilty Gear** Judgment for the **PSP** system offers the fast paced arcade fighting of Guilty Gear X2 #Reload plus brand new side scrolling action in Guilty Gear Judgment. Guilty Gear Judgment features 21 Guilty Gear characters, including Sol Badguy, Potemkin, May, Dizzy and Faust, all of whom have their own unique combos; multiple modes of play including Story Mode (with intertwining character stories) and two player co-operative fighting. In Guilty Gear X2 #Reload, players assume the role of 23 Guilty Gear characters and compete across six modes of play including 2-player Head-to-Head, Arcade, M.O.M (Medal of Millionaire), VS CPU, Survival and Training. The game features 21 Guilty Gear character favorites, including Sol Badguy, Potemkin, May, Dizzy, Faust and more. In Story Mode gamers can choose from 5 character stories at the start and unlock 15 other characters as they encounter additional characters within the initial storylines. Co-Op Mode on the other hand enables you to play with a friend via the PSP's wireless connectivity, while Survival Mode forces you to survive as many battles as possible without continuing. There are also some intertwining stories between single player campaigns which reveal insights into each character's personality and past. Basically, all you have to do in order to have a good experience with the game is to master each character's signature combos and beat down opponents with special moves.
