[Hitman 2: Silent Assassin Cheats](#)

You're the means to someone's end.

Oh, dear 47. It would have been so unfortunate for you to really retire. I'm glad that your quality skills don't need to wear off by giving up on what you do best - kill people. There's always a time to take the shot and a time to hide and wait. I'm sure you'll do just marvelously (I am aware of your past experience). Pursuing the organization that put you out of... retirement will surely prove to be quite an adventure and I'm sure you will take on a few contracts just so you can pay for all that artillery you plan on using on the poor guys. Just as always, do your best to remain anonymous or this journey will end much faster than you planned. You do remember of course that chance favors the prepared player. This is why we thought about preparing you with a little of extra enhanced abilities. All you need to do is take a look at the following cheating codes and apply them to ease your job. For starters, locate your **Hitman2.ini** in the Hitman2 folder and open it in Notepad. Right below the "EnableConsole" string, make a quick addition: **EnableCheats 1** Save your changes (remember it's still an .ini file) and close the file. You can now enter any of the following codes during gameplay to receive various boosts: IOIRULEZ - God Mode on/off IOIGIVES - All Weapons and Items IOIHITLEIF - Health IOISLO - Slow motion on/off IOIER - Bomb Mode on/off IOIHITALI - Ali Mode on/off IOILEPOW - Special attack Mode on/off IOIGRV - The force of gravity Mode on/off IOINGUN - Nail rifle Mode on/off IOIPOWER - Mega Power
