[Hulk Passwords and Cheats \(GameCube\)](#)

Double your HP and select the level you want to play

Hulk is a video game that is based on the 2003 movie of the same name. It was developed by Radical Entertainment. A signature feature is the star of the film, Eric Bana reprises his role of Bruce Banner. The Hulk game begins in a dream where the Hulk destroys waves of soldiers and tanks sent by the military to destroy him. Upon awakening, Bruce is contacted by his old mentor, Professor Crawford who explains that he has developed a cure for the Hulk called the Gamma Orb but military troops (led by the corrupt General Ryker) have raided the lab.

Bruce sneaks into the lab and allows Dr. Crawford to use the **Gamma Orb** on him, but Dr. Crawford uses it to seal the Hulks energy simultaneously transforming Bruce into the Hulk as Crawford becomes ravage. After a lengthy chase of Ravage over rooftops and through sewers with Rykers forces in hot pursuit Hulk finds himself at a dead end where he is ambushed by Half Life. Here's a list of passwords that will make the title's gameplay more challenging and fun :
