## [Is PSP becoming a mobile porn console?](#)

*For now, in Japan*

It was impossible for the pornographic industry not to be drawn by PSPs' popularity. Seeing that the portable gaming console can also be used to watch movies in UMD format, it was just a question of time before the special PSP-porn movies were to appear. Thus, two Japanese companies involved in the porn industry, h.m.p. and GLAY'z, announced that they are already preparing titles in UMD format, most likely to be released in July. The 8 titles, varying from Big-Breasted Nurse Amagoromo Mitsu, Kaneshiro Anna: The High Class Soap Mistress to Beautiful Body - Ero-Terrorist Noa are intended to be sold especially in Japan but are region 2 coded, so they will also be available for European viewers. The prices announced for these movies range between 18 and 32 dollars, but the movies will be partially censored and because they are region 2 coded, it looks like they won't be available for PSP consoles sold in the United States. However, there are already some rumors the PSP user community regarding the fact that the UMD disks will most likely be region-free coded. Playboy has already announced the release of special erotic content for PSP consoles, so it looks like, while some are desperately trying to impose .XXX domains for adults' sites, porn's actually going mobile.
