## James Bond 007: Nightfire Cheats

*Ian Fleming's secret agent is shooting his way to prevent a new world order.*

A super secret agent's job is rarely easy and never simple to understand. There is always a bad guy plotting against humanity. Let's take Nightfire for example. Nightfire is the codename for a decades-long operation that is meant to redraw every borderline on the world's map. At first, the mission seems ridiculous. Raphael Drake is the president of Phoenix International whose sole goal was said to be getting rid of all the unnecessary nuclear weapons and power plants in order to cleanse the environment. Turns out that Drake is not the world's greatest green-industrialist after all. The spirits just managed to get a little agitated as the Phoenix International is suspected to have much to do with the theft of a ballistic weapons guidance microchip that was meant to be part of the United States Space Weapon Platform (USSWP). Siding with the beautiful CIA agent Zoe Nightshade (that you met in Agent Under Fire as the prime Bond girl) he takes the first step in uncovering the intricate Nightfire story. This game's Bond girl appears as you both track down some nuclear missiles. Dominique is a French agent for DGSE. Fate is not kind on her however, but you'll find out for yourself what happens on the roof of Drake's building in Tokyo. **Quick guide to the missions in James Bond 007: Nightfire**
