Juiced 2 Achievements (PC)

A complete list of achievements for the PC version

Juiced is a video game for the PlayStation 2, Xbox, PC and mobile phone. Its release was delayed in 2004 because of its original publisher Acclaim going bankrupt. The game was then picked up by THQ, the game was then further delayed as several changes were made. In early 2006, UK software publisher Focus Multimedia re-released the PC version of **Juiced** at a new budget price point as part of its Essential games range. The game offers many different modes including career and arcade mode that present the player with challenges, which gradually gets harder. A player can customize the car to suit their style and unlock new ones (by unlocking in arcade mode). A special feature added was the use of nitrous as expected since it is similar to other racing games which have the feature. This can be particularly useful for when the player is behind an opponent or is behind time, but the AI can also use the nitrous oxide. ([Wikipedia](#))

ACHIEVEMENTS
