Juiced - Cheats and Secrets

The racing simulator that could

Juiced was supposed to be the primary rival of the Need for Speed series, but instead it ended up in the bottom drawer. The game wasn't that bad but the press tore it apart limb by limb and eventually got scraped. For those of you that still loved it in spite of what everyone was saying here are some secrets and cheats so you can properly evaluate it! **Select the cheats option in the menu, here you might enter the following codes.** CARS - All cars ALL - All codes activated PINT - All arcade mode cars and developer tracks CHAR - Character test mode RESP - Everyone respects you CREW - Full crew CASH - More money WIN - Win all races **Unlockables** Unlocks prototype mods for all cars in career mode and the Extreme Nitrous Series in Arcade Mode. 100% Completion In Career Mode Unlocks the Bronze, Silver, and Gold Prototype Challenge Series Complete all the series in Arcade Mode, except the Extreme Nitrous Series. Unlocks All Prototype Parts Get 1,500 respect points from all CPU characters. **Train your Crew members** To train your crew members, simply get the cars in the same class and make a race on your racetrack (3vs3 for example), choose circuit and 12 laps and watch the race. Repeat a few times and their stats get maxed in a reasonable time. **Upgrade Cars fast** Buy a car and let one of your crew members drive it in a race three times (if he is winning) or four times (if he is not winning). The fastest way is a 2-lap circuit race on your own track. **Easy money:** Earn 600 respect from any CPU character. Then, call any character on your mobile phone. Race for pink slips with one of your less powerful cars. After you get there, sell it for extra money. Make sure you have more than one car in case you lose the race.
