LG U900 - first commercial UMTS DVB-H handset

LG Electronics launched **LG** U900, the first mobile phone on the market functioning in UMTS (WCDMA) DVB-H networks. The handset was announced in Rome, Italy and will be offered through the Hutchinson Company early May of this year. Hutchison Italy, 3G telecommunications provider, has exclusive DVB-H (Digital Video Broadcasting - Handheld) broadcasting rights for the 2006 **World Cup**. The company will provide video footage of all World Cup matches beginning June 6, through the Hutchison's service channels, 'La3'. Hutchison plans to offer the LG UMTS (WCDMA) DVB-H phone to customers world-wide, after initially establishing a base in Italy. LG-U900 users will watch TV shows up to 3 hours because of the phone's long battery life. Even more, the handset is equipped with 1.3 mega pixels **VGA** camera and 58 MB internal memory. Other features:- Dimensions: 100.6mm x 50.6mm x 21.4mm- Display: 2.2 inches LCD, 240X320, 262K TFT-17 speakers-512MB Transflash memory card- USB, Bluetooth- Internal antenna (3G/GPRS), Antenna (DVB-H)- Battery: 950 mAh
