[MOTORIZR Z3 Available from T-Mobile](#)

Available starting this week

MOTORIZR slider
Motorola

The stylish and well crafted [MOTORIZR Z3](#), the first GSM slider in the U.S., from Motorola, Inc., will be available beginning this week exclusively from T-Mobile USA, Inc. Featuring an integrated 2.0 megapixel camera with 8x zoom, high-intensity camera light, landscape view finder and dedicated external camera button, the phone gives people the experience and benefits of a functional digital camera, with the capability of shooting and sharing photos quickly. To help people stick together, sharing pictures with those who matter most is simple using T-Mobile's My Album, a personal online album that stores pictures, video and voice messages for easy viewing and sharing. Users can easily access the My Album link built into the [MOTORIZR](#), and quickly access their myFaves contacts to send fun picture messages, as well as video, text and instant messages. "In keeping with Motorola's tradition of innovative design and cutting-edge technology, the new MOTORIZR Z3 is Motorola's first GSM slider form factor - allowing consumers another choice for mobile phones," said Jim Wicks, vice president, Consumer Design Experience, [Motorola](#), Inc. "Combined with a myriad of features, the beautifully crafted MOTORIZR Z3 also delivers a dynamic imaging and personalization experience." Users also can rock to favorite tunes with a built-in music player that supports a variety of audio formats and stereo [Bluetooth](#) wireless technology for hands-free listening. Storage space for music, photos or files is expansive, using the microSD slot for up to 2GB of optional removable memory. The MOTORIZR Z3 is equipped with video capture and playback, quad-band technology and USB 2.0 connectivity for file transfers and data access. The [MOTORIZR Z3](#) is now available exclusively at T-Mobile retail stores and select authorized dealers, and [online](#).
