## [MWC 2008: HTC X7510 Advantage - Based on Future Version of Windows Mobile OS](#)

*More than just an updated version of the older X7500 Advantage*

**HTC** has recently announced, at the 2008 GSMA Mobile World Congress, that it decided to enhance the successful X7500 Advantage model, by bringing in a new updated version, called Advantage X7510. The newly arrived device introduces new software, increased storage and an improved keyboard. Just like its predecessor HTC Advantage X7510 will remain an ideal companion for the business traveler who needs a powerful and portable device that includes constant connectivity. Developed from the ground, the **HTC Advantage** integrates a broad set of features into a compact and innovative design. Based on a future version of Windows Mobile, the updated HTC Advantage includes a customized HTC Home today screen that provides one-touch access to emails, text messages, missed calls, calendar appointments and contacts, as well as current weather conditions and forecasts for hundreds of cities around the world. The HTC Advantage features HTC's **TouchFLO** software, which enhances finger touch scrolling and browsing of Web pages, documents, messages and contact lists. The Advantage will also include Opera Mobile 9 and Google Maps for mobile. In addition to the many software enhancements, the **HTC Advantage** also adds a variety of new and improved hardware features, including 16GB of storage, a new improved keyboard with haptic feedback and an updated version of VueFLO, using a G-sensor that recognizes the screen orientation of the device for optimal customer usage. With its innovative built-in video output capability, the HTC Advantage empowers its users with freedom to make presentations anywhere. Users can run presentations directly via the projector and TV output. Its 5-inch VGA color touch-screen and innovative, magnetic **QWERTY** keyboard are ideal not just for editing Microsoft Office documents, but also for enjoying leisure time. Users can watch videos, browse the web, use instant Outlook push e-mail, synchronize their contacts, tasks and calendar, and navigate anywhere with inbuilt GPS and **TomTom NAVIGATOR 6**. Offering a complete package of connectivity, the HTC Advantage offers a wide variety of Wireless connectivity options, such as Tri-band HSPDA, Wi-Fi and stereo Bluetooth 2.0 connectivity. The updated HTC Advantage will be available in March, in select countries across Europe. More detailed technical information can be found [here](#).
