## [DVD Backup Solution with PSP Support](#)

### *XCopy 9 by Bling Software*

Bling Software has just released XCopy9, which allows users to backup DVD movies and transfer them to a Sony PSP with just one click. The XCopy9 package comprises two components: XCopyDVD (for home DVD backup) features one of the fastest DVD burning engines on the market today. Regardless of the user's computer skills, backing up favorite DVD movies can be done without sacrificing quality. The software supports dual-layer burning for 1:1 backups, which avoids splitting movies to two DVDs. Users no longer have to remove trailers or special features to get the movie to fit on a single DVD. XCopyPSP also transfers DVD movies to the PSP memory stick. The PlayStation Portable (PSP) is Sony's latest handheld device that lets users play video games, listen to music, view pictures and most importantly in this case, watch videos. XCopyPSP optimizes the video from any DVD movie on the fly. **About XCopy9** Backup an entire DVD collection or episodic DVDs Transfer DVDs to view on PSP! Support for all blank DVD media Support for all multi-channel audio formats (DTS, 5.1, 6.1, etc.) **System Requirements** Windows 98SE/ME/2000/XP Intel Pentium 800 MHz 128 MB RAM Direct X 8.1 or higher up to 10GB temporary disk space and DVD-R/RW or DVD +R/RW burner 512 MB or greater memory stick required for PSP Internet connection required for full functionality Available now, XCopy9 carries a suggested retail price of \$49.99, while XCopy PSP (without DVD) is priced at \$29.99. This week, Softpedia would like to know your opinion on gaming consoles. What is your favorite console you either own or you are planning to buy? Are you an Xbox fan or a Playstation fan? Has Xbox360 convinced you it's time to buy one? Or you'll wait for the PS3? [Express your opinion here.](#)
