[Manhunt Cheat Codes \(PS2\)](#)

Unlock God Mode and become invisible

They just killed Cash. Now they want to kill him again. America is full of run down, broken rust-belt towns where nobody cares and anything goes. In [Carcer City](#), nothing matters anymore and all that's left are cheap thrills. The ultimate rush is the power to grant life and take it away, for sport. This time James Earl Cash, you are the sport. You are a death row inmate that has been sentenced to death by lethal injection, however in a twist of fate, you awake to the sound of your own panicked breath. They gave you your life back. Now, they are going to [hunt you down](#) in an organized sport where you are the prey. You must run, hide and fight to survive. The game takes place all over Carcer City, in locales that have been sectioned off with the help of bribed local authorities and police. If you can stay alive long enough, you may find out who did this to you. This is a brutal blood sport. **Codes Cheat Codes**
