[MapleStory Hacks \(PC\)](#)

Feast on those hacks, users!

MapleStory is a free, 2D, side-scrolling Massively Multiplayer Online Role Playing Game developed by the Korean company Wizet. Several versions of the game are available for specific countries or regions, and each is published by various companies such as Wizet and Nexon. Although playing the game is free, many player appearances and gameplay enhancements can be purchased from the "Cash Shop" using real money. MapleStory has a combined total of over 50 million players in all of its versions. MapleStory Global, for players mainly outside of East Asia, Southeast Asia and Europe, has over three million players. In the game, players walk around in the "**Maple** World" and defeat monsters and develop their character's skills and abilities, as in typical role-playing games. Players can interact with others in many ways, such as through chatting, trading, and playing minigames. Groups of players can band together in parties to hunt monsters and share the rewards. Players can also band in a guild to interact more easily with each other. **Hack list**

1. Maple Story Godmode Hack - you won't die, now there is no need for hp pots.
2. MapleStory Vacuum Hack - vac all the monsters and items to one spot very good to level up with.
3. Maple Story Infinite MP Hack - you don't need to worry about magic anymore! Use all the mp you would like!
4. MapleStory Speed Hack - attack and cast magic faster. Very good with vac hack!
5. Maple Story Fly Hack - go anywhere in the map, good with vac cheat.
6. MapleStory Auto Clicker - automatically click, perfect with party quests.
7. Maple Story Meso Hack - all the free meso or money you'll ever need!
8. MapleStory Bot Hack - auto attack monsters without doing a thing! This is the best if you are at school or do not choose to play!

MapleStory Hacking Vocabulary

Hacking: Changing information to change the way a game is played or what happens throughout the gaming server.

Server Side(SS): Things happening on the server (Everyone can see this happening).

Client Side(CS): Things happening through your own client (Only you can see it).

GodMode(GM): A hack that allows you not to get hit.

Wall vac: A hack that closes in on the coordinates the monster can access, basically a wall pushing in on all sides. This makes all monsters sucked to one spot (unless there are walls or other obstacles on the way).

UCE (Undetected Cheat Engine): an edited source of CE that can currently bypass one, some, or all version of Maple Story.

Unlimited Attack: A hack that bypasses the 100-hit system Maple Story.

Tubi, Super Tubi: A hack that enables you to pick up at a much faster rate.

Fly Hack: A hack that enables you to maneuver around the air.

Gravity Hack: Changes in "gravity" make you float or jump higher (depending which kind you're doing and how low you set it).

Uber/Speed/Fast attack: A hack enabling you to attack faster than the normal rate. Here's a video that shows this game's hacks at work:
