[Marvel Nemesis: Rise of the Imperfects Hints II \(DS\)](#)

Join these heroes

An epic war has struck the Marvel universe and its outcome is in your hands! Marvel Nemesis: Rise the Imperfects delivers the most authentic and cinematic Super Hero fighting experience ever seen in a video game, while remaining faithful to Marvel's comic legacy.

Pit the most legendary Marvel Super Heroes against The Imperfects, a group of Super Heroes created collaboratively by Marvel, EA and top comic book industry talents, in all-out duels, to determine who is the most powerful of all. Control a number of characters from Marvel's library of Super Hero families, including Spider-Man, Wolverine and Iron Man.

Experience what it's like to fully possess each Hero's superpowers, and unleash them on enemies, with devastating effects, pummel, and ultimately crush adversaries, in fully interactive and highly destructible fighting arenas.

Marvel Nemesis: Rise of the Imperfects features locations from the Marvel's universe, as well as New York City landmarks. Use this environment to your advantage, and defeat enemies in head-to-head battles, in online multiplayer challenges, or in the single-player mode.

The game enjoyed a moderate success, as people were attracted by it only because of the Marvel superheroes. Industry critics and analysts said that the game was mediocre in comparison to other superhero titles, and that the story wasn't very thrilling and didn't offer a lot of motivation for players to finish the game.

HINTS

Danger Zone: Easy win

When playing at the Danger Zone level, a person can walk through the big "4" into the Danger Zone. Once in the Danger Zone, if a character throws their opponent off the cliff, towards the screen, that person will be dealt damage, then respawn, and they will be launched off the cliff again, which takes more damage. This will continue to happen until the character is dead. It makes for an easy win. However, you must break the crystals at the edge of the cliff closest to the screen when you appear in the Danger Zone. Throwing your opponent at them usually does the trick.
