[Mega Man Star Force: Dragon Unlockables and Secrets \(Nintendo DS\)](#)

A bit like Sonic, a bit like Mario...it must be Mega Man

Mega Man Star Force is an action RPG video game published and developed by Capcom for the Nintendo DS handheld video game console. It was released December 14, 2006 in Japan, and has a tentative North American release date for August 07. **Mega Man** Star Force has many similarities to the Mega Man Battle Network series, but is considered a separate entity. Both an anime and manga were produced several months prior to the game's Japanese release date and are currently running in Japan. The Mega Man franchise takes place in two separate timelines, one where robotic technology flourished and another where network technology prospered instead. The Battle Network series was placed in the network timeline, causing it to be completely disconnected from every other **Mega Man** series (Classic, X, Zero, ZX, and Legends). Mega Man Star Force explicitly states that it takes place approximately two-hundred years into the future of Battle Network, thus placing it into the network timeline. As such, Star Force deviates greatly from the standard Mega Man fare because it draws almost exclusively on elements from Battle Network (mostly gameplay elements), making very few references or allusions to the other Mega Man series. However, Capcom has produced Star Force as a stand-alone series, meaning players can fully enjoy the title without being familiar with the Battle Network series.

Unlockables Title Screen Star Marks Accomplish something in-game to receive these different icons on your New Game/Continue screen. Getting them all will also result something new to appear on the screen. One will also be able to fight the Infinity Version of the Final Boss at the end of the game which has 4000 HP.
