## [Metal Gear Solid Mobile Available Exclusively from Verizon Wireless](#)

*We're waiting for the European version*

Verizon Wireless and [Konami](#) just announced that Metal Gear Solid Mobile is available for purchase exclusively through Verizon Wireless. Metal Gear Solid Mobile is an award-winning game, having recently received the Grand Prix and Operator's Choice awards at the 2008 International Mobile Gaming Awards ([IMGA](#)). Metal Gear Solid Mobile features never-before-seen dramatic 3D art displays and camera work that greatly surpass the current standard of mobile games and allows players to shift the viewpoint from first to third person and to control a variety of weapons. The game also takes advantage of the camera functionality - for example, Verizon Wireless customers can use their camera phones to capture images and the game will incorporate the image colors into the players' camouflage system. Designed by the same team behind the Metal Gear Solid console games, [Kojima](#) Productions, and developed in conjunction with Ideaworks3D and utilizing its Airplay 3.5 SDK, Metal Gear Solid Mobile is an original game designed specifically for the mobile platform. Players face the same extreme tension of solitary infiltration that fans of the classic tactical espionage action game have come to expect from the Metal Gear Solid series, previously released to the PlayStation and PlayStation 2. Verizon Wireless customers can purchase Metal Gear Solid Mobile in the Get Fun & Games shopping aisle in the Get It Now virtual store. The game is available for \$4.99 monthly access or \$10.99 for unlimited use purchase. Verizon Wireless customers can get Metal Gear Solid Mobile on more than 20 popular Get It Now-capable phones, including the Voyager by LG and the LG VX8700. Download charges for Get It Now applications vary and airtime or megabyte charges may apply when browsing, downloading and using certain applications. Customers need a Get It Now-enabled handset and [Verizon Wireless](#) digital service to access the Get It Now virtual store.
