[More Updates Available for Photoshop Mac users](#)

[Output Module Update \(Bridge CS4\), OnLocation CS4.0.1](#)

Whilst [updating](#) Version Cue Server to Version CS4 4.0.1 and releasing a Drive and Services Update for CS4 users, Adobe Systems has also provided PDF and web gallery creation capabilities inside Adobe Bridge CS4, through an Output Module update for Adobe Bridge CS4. Additionally, the Flash maker has released OnLocation CS4.0.1, delivering enhancements and bug fixes.

According to Adobe, the Output Module provides PDF and web gallery creation capabilities inside Adobe Bridge CS4. Offering the ability to add header and footer information to PDF files and reduce the size of JPEG files generated for use in web galleries, the update is highly recommended for Photoshop CS4 users.

System requirements include: PowerPC G5 or multicore Intel processor; Mac OS X v10.4.11-10.5.4; 512MB of RAM (1GB recommended); 1,024x768 display (1,280x800 recommended) with 16-bit video card; graphics support for Shader Model 3.0 and OpenGL 2.0 for some GPU-accelerated features; QuickTime 7.2 for multimedia features; broadband Internet connection for online services.

To install the Output Module, update for Adobe Bridge CS4, download the file using the link provided below, mount the disk image, double-click the Setup icon, and then follow the steps provided by the installer. As soon as the installation is complete, reset Bridge preferences by pressing Cmd+Opt+Shift immediately after launching the application.

Adobe OnLocation CS4 offers a powerful, direct-to-disk recording and monitoring solution for Intel based Mac OS systems. The software ships with Adobe Premiere Pro CS4. Adobe's latest release (CS4.0.1) contains more than 60 improvements and bug fixes in this area of performance, as well as device, project, and format handling, the changelog says.

System requirements are the same with those of Adobe Premiere Pro CS4. Installation Instructions go pretty much the same as with OnLocation, only you don't need to reset or shut down anything - just click Finish when the installation completes, and you're good to go.
