[Motorola A1200 - Coming in January 2006](#)

Motorola continues its design revolution of RAZR family on A1200

Although it's unlikely that we'll be seeing this [Motorola](#) new handset anytime soon, the still-under-development A1200 seems to have a design that could be very popular in the US. The [Motorola](#) A1200 will be equipped with a 2 megapixel video camera and weighs only 95 grams. It features a big 2.4 inch 240×320 pixels [QVGA](#) TFT screen and 8MB built-in memory. The storage space can be further upgraded by using the T-flash memory up to 512MB. The A1200 comes with a lot of business critical features, such as business card scanning function, it supports [POP3](#), IMAP4, SMTP e-mail protocol. Also, users can browse and edit Word, Excel, Power point files. The multimedia part of the A1200 is one of the best with more than 10 types of file format supported, Real Player, [MP3](#), MP4, AAC+ etc. with its [Bluetooth](#) stereo headset, it is the entertainment center on your hand. The battery lasts about 270-480 minutes minimum talktime and 190-210 minutes in standby time. While it's almost sure that the A1200 will be available sometime in January, there's still no word about its price.
