[Motorola Adventure V750 Out Now from Verizon](#)

New and tough clamshell

First unveiled (in an unofficial way) back in April, [Motorola](#) Adventure V750 has been released today in the US by Verizon Wireless, coming in a week before its rumored launch date (July 28). The new V750 is available, as of now, via Verizon's business channels, as well as on the carrier's official website, for prices starting at \$99 (with a contract agreement for two years and after a \$50 mail-in rebate). The coolest thing about Motorola V750 is that it's a combination between a tough handset and a mid-end multimedia clamshell. The "Adventure" part from its name is not there because it sounds good, but because the new phone is rugged and meets the 810F military standards for shock, vibration, dust, solar radiation, high and low temperature, and altitude. Moto V750 brings the following features: a 2.2 inch TFT internal display with 240 x 320 pixels and 65K colors, a 1.6 inch external display with 120 x 160 pixels and the same number of colors, Push to Talk, VZ Navigator, EV-DO Rev. A connectivity, Web browser, email, Instant Messaging, Music player (supporting MP3, WMA, AAC and AAC+), dedicated music keys on the outside case, V CAST Music with Rhapsody, V CAST Video, Bluetooth 2.0, a 2 Megapixel camera with video recording, Field Force Manager, Advanced Speech Recognition, voice command, speakerphone and expandable memory (up to 8GB). Motorola V750 weighs 3.94 ounces (111 grams) and, when closed, measures 4.0 x 2.0 x 0.65 inches (102 x 51 x 16.5 millimeters). The battery included in the clamshell should last up to 230 minutes in talk-time mode or up to 83 hours in stand-by mode. There is no word yet on whether Motorola V750 will be offered from other mobile operators except [Verizon](#), but a possible future carrier for the Moto Adventure is [Sprint](#), which is known for having lots of rugged handsets in its lineup.
