## [Motorola Z6W and U9 Going to Canada](#)

### *Via Fido*

Fido will soon launch two new Motorola phones, the Z6W and U9 models, both coming to enlarge the already existing line-up of Moto handsets offered by the Canadian carrier.

Although they're both made by [Motorola](#), the new handsets that Fido's users will be able to buy are quite different, both in design and features. First of all, the Z6W is a slider with firm edges, while the U9 is a clamshell with a round and delicate appearance.

Announced in February, Motorola Z6W follows the line of the earlier Z6 and Z6c models, but it pushes things a little further when it comes to features. The list of specs offered by the new Z6W includes: a 2 inch TFT display with 240 x 320 pixels and 256K colors, Wi-Fi, quad-band GSM connectivity, Bluetooth 2.0 with A2DP, a 2 Megapixel camera with flash and video recording, Music player (MP3, AAC and AAC+ supported), Opera 8.5 browser, email, Instant Messaging, organizer, voice dial, handsfree, miniUSB, 64MB of internal memory and microSD card support. The handset weighs 110 grams, measures 105 x 45 x 17.3 millimeters (when closed) and packs a 950 mAh battery that should, theoretically, be enough for up to 7 hours of talk-time and up to 400 hours of stands-by time. Motorola U9 is created for those who want to have a fashionable (but not too expensive) phone. We [saw the phone](#) live, back in March, during CeBIT 2008, and we can confirm that it's a fancy little clamshell and it will probably attract more girls/women than men. Its features include a 2 inch internal display with 256K colors and 240 x 320 pixels, an external 128 x 160 OLED screen, touch-sensitive music-dedicated keys, Windows Media Player 11, Bluetooth 2.0 with A2DP, a 2 Megapixel camera with video recording, microSD card support, USB 2.0 and so on. We can't say yet when the new Moto phones will be available from Fido, but [Mobile in Canada](#) says a June release is expected. And since we're now in June, the Z6W and U9 should soon hit the market.
